

Space exploration receives \$100,000,000 per day (40 Billion/year) of worldwide taxes, that could help research disease and end poverty!

Supposing from having made your own observations that your results confirmed that we are being lied to about the dimensions of Earth...Would you be open to it being geocentric and either flat or a 4th dimensional shape? Because according to the scientific method, evidence should be observable, measurable, repeatable and falsifiable. Though only measuring something without being able to manipulate it, does not define it as the independent variable. So gravity, the big bang, evolution and quantum physics are all theoretical.

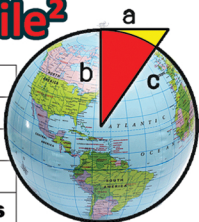

If Earth really orbits the Sun at 66,000 miles per hour and the Sun is truly shooting around the Milky Way at 495,000 miles per hour...

1. How could we return to Earth after having landed on the Moon or Mars, if no spacecraft can even reach our supposed orbit speed?
2. Why have none of the Star constellations suffered any disfiguration, in over 10,000 years? (Pyramids + Aztec & Mayan calendars)
3. Can we trust these speeds and measurements without having travelled and the dating of rock strata & fossils, with circular reasoning?

If Earth was 25000 miles in circumference, there would have to be approximately... 8 inches of curvature per mile²

Distance	Drop
1 mile	8 inches
10 miles	66 feet
100 miles	6660 feet
Accurate until 2000 miles	

CHECK FOR YOURSELF:
Observing entire buildings along the coast during the day and street lights at night, from over 10 miles away at water level

Moonlight chills water by 2 - 3°F within 30 minutes
Check for yourself, during the waning phase!

Over 10000 years, without any disfiguration to any of the zodiac constellations?

Orion's belt still aligns with the Giza pyramids, Aquarius has not spilled any water, Scorpio's claws have not closed...

STARS CHANGE COLOUR, SHAPE & SIZE
+ They all come into focus at the same distance
Record a video and playback in slow motion
Prove that they are not 25 TRILLION miles away!

Seeing only HALF of the Moon while the Sun is directly in front of it...

Proves that moonlight is not just a reflection of sunlight. As if nothing is between them, we should see the whole face!

When viewing a supposed video of Earth spinning from outer space, why is it that we always see the clouds fixed throughout the whole rotation? Why are there are never any stars behind the moonwalks, nor when floating in outer space, nor in any of the images of Earth from outer space? Why is there no recordings of a spaceship leaving Earth's atmosphere, nor an astronaut transitioning from a pressured chamber to a vacuum? Are the recordings of astronauts, with bubbles coming out of helmets, hanging with cables and the ladies using hairspray, to falsify anti-gravity? Why in 60 years, have no astronaut has ever made a 360 degree turn while recording... Maybe because they are in a Hollywood studio? The label "Flat Earther" was coined to cause a debate, a debate designed to divide and distract us from dealing with those that are lying to us. Globe syndrome prevents us from exploring the physical and philosophical dimensions. Big Bang & evolution suggest that we are lost in space, insignificant and irrelevant regardless of which interpretation of reality or religious beliefs that may resonate with you. (A perception deception!) Whenever possible, it is better to compare results from having personal experience than to learn from the conclusions of others. When a scientific hypothesis is promoted, fanaticism is created and we are encouraged to idolize the spokesperson and the brands of authority, which causes us to maintain blind faith. It is not better to promote Natural Sciences, which emphasize how to reproduce experiments to know? Fire is hot, ice is cold, water is wet and smoke is dry etc ... anything else is an interpretation, maybe even an educated guess but it's still a belief!
